Unsuitable extinguishing High volume water jet. media				
Hazards from the In a fire or if heated, a pressure increase will occur and the container may	,			
substance burst.				
Hazardous combustion Decomposition products may include:				
	Carbon oxides, Nitrogen oxides, Other noxious substances.			
	Promptly isolate the scene by removing all persons from the vicinity of the			
	incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.			
Special protective Fire-fighters should wear appropriate protective equipment and self-contained.	ined			
equipment for fire fighters breathing apparatus (SCBA) with a full face-piece operated in positive	iiiica			
pressure mode.				
6. Accidental Release Measures.				
Personal precautions Wear appropriate Personal Protective Equipment (see section 8). Provide adequate ventilation.	,			
Environmental Avoid dispersal of spilt material and runoff and contact with soil, waterways,				
precautions drains and sewers. Inform the relevant authorities if the product has caused	ed			
environmental pollution (sewers, waterways, soil or air). Small spill Stop leak if without risk. Move containers from spill area. Absorb with an ine	nort			
dry material and place in an appropriate waste disposal container. Eliminate				
all ignition sources. Use spark-proof tools and explosion-proof equipment.				
Dispose of via a licensed waste disposal contractor.				
Large spill Stop leak if without risk. Move containers from spill area. Prevent entry into				
sewers, water courses, basements or confined areas. Contain and collect				
spillage with non-combustible, absorbent material e.g. sand, earth, vermicul				
or diatomaceous earth and place in container for disposal according to local				
regulations (see section 13). Eliminate all ignition sources. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste dispose				
contractor. Contaminated absorbent material may pose the same hazard as				
the spilt product.	ao

7. Handling and Storage.			
Handling	Wear appropriate PPE, and ensure there is adequate ventilation and extraction in the work area. Avoid skin or eye contact, or breathing in the product. Follow precautions listed in section 2 for handling flammable/combustible liquids.		
Storage	Keep container dry and tightly closed, in a cool, well-ventilated area, away from direct sunlight. Keep away from heat, sparks and open flame.		

8. Exposure Control/Personal Protection

Exposure Standards

No exposure limits set for the finished product, listed components below.

Engineering Controls	General ventilation and local exhaust should be suitable to keep vapour concentrations below WES/TWA. Ventilation equipment should be explosion-proof when operating in flammable zones.
Personal Protection	
Respiratory	Wear a vapour respirator, if poor ventilation.
Eyes	Wear chemical goggles/face protection.
Hands	Wear chemical gloves – PVC, Polychloroprene or Nitrile.
Other	Wear overalls or dust coat. Use PVC apron when handling large quantities.
