

Procoat Roof Clean Concentrate

Product	Procoat Roof Clean Concentrate PR182
Description	Procoat Roof Clean Concentrate is a high strength, slow release cleaner designed to safely treat and remove moss, mould, algae and lichen from most common exterior surfaces, including roofs. Procoat Roof Clean Concentrate contains a special blend of biodegradable surfactants to ensure maximum product penetration for improved performance.
Active Ingredients	Alkyl Dimethyl Benzyl Ammonium Chloride, Biodegradable Surfactants > 30% active
Dilution	Mix 1 part Procoat Roof Clean Concentrate with 20 parts water for general cleaning. For more instantaneous results, or where there is heavy contamination, the concentration can be increased to 1 part Procoat Roof Clean Concentrate to 10 parts water.
Reaction Time	Procoat Roof Clean is a slow release formula that continues to treat the surface over many months. Once treated, a badly contaminated surface may take months to become clean. For best results, ensure that the mixing and application instructions are followed, and if necessary increase the strength for faster results.
Application	Apply with a pressure sprayer. Procoat Roof Clean Concentrate is best applied in overcast conditions to avoid rapid evaporation. Do not apply if rain is expected within 4-5 hours. Wet approximately 10m ² at a time ensuring the surface is well saturated. For best results, as the surface starts to dry out rewet again lightly. Do not rinse off. Procoat Roof Clean will slowly treat the surface, reactivating when it rains. If treating roofs used for the collection of drinking water , ensure the water supply is disconnected until a minimum of 5 rainfalls or 30mm of rain has fallen.
Maintenance	Keep surfaces looking tidy by reapplying yearly, or when recontamination occurs.
Health and Safety	For detailed health and safety information refer to Material Safety Datasheet (MSDS) Usage <ul style="list-style-type: none">- Provide adequate ventilation during use- Keep out of reach of children Personal <ul style="list-style-type: none">- Avoid contact with skin and eyes- Wash hands after use Protective equipment <ul style="list-style-type: none">- Wear protective eyewear and waterproof gloves- When spraying, wear dust mask or suitable respirator Storage <ul style="list-style-type: none">- Store away from direct sunlight

Health Effects

If poisoning occurs, contact a doctor or Poisons Information Centre (NZ 0800 764 766).
If swallowed: Rinse mouth with water. Do NOT induce vomiting. Give a glass of water.
Eyes: If in eyes, hold eyes open, flush with running water for at least 15 minutes,
Skin: If skin contact occurs, remove contaminated clothing and wash skin thoroughly.
Inhaled: Remove from contaminated area.

Spills and Disposal

Do not allow spilt material to enter drains or other watercourses. Absorb spills with sand or other inert material. Do not pour leftover paint down the drain. Unwanted paint should be kept in a sealed container, such as an empty paint can, and disposed of via special waste collection services. Check with your local council regarding the disposal of empty paint containers. Empty paint containers should be left open in a well-ventilated area to dry out. When dry, recycle steel containers via steel can recycling programs. Disposal of empty paint containers via domestic recycling programs may vary between local authorities.
